

Plant Trailers

The AD range of Plant Trailers is recognized within the construction and plant hire industries for reliability, durability and the high standard of manufacture.

There are six AD models available all offering superb design and innovative features.

- 1 Bolt on 'knee' prop supports on ramps for increased stability during loading and unloading
 - 2 Chequer-plate galvanised steel construction provides durability and strength
 - 3 Rear light clusters are well protected to help avoid accidental damage
 - 4 The extended A frame incorporates a bucket rest ensuring maximum clearance from the dipper arm to the rear of towing vehicle
- Triplelock coupling available

The AD Range

AD1150

- The only trailer built specifically for 3/4 tonne machines

AD1600

- Designed to attain a 2000Kg towing capacity which is especially relevant when towing with Transit vans
- Aluminium ramps reduce weight
- Bolt on load bearing mudguards

AD2000

- Full width ramp tail
- Raised bucket rest allows transportation of an excavator with the ditching bucket attached
- Reinforced chassis and solid ply ramp option make it suitable for 800mm double drum rollers

AD2500

- Narrower width for easier towing and reduced chance of over-loading
- Capable of carrying 1200mm rollers due to the reinforced chassis and with the ply ramps option
- Load bearing cheque plate mudguards
- Full width ramp available

AD2800

- Capable of carrying 1200mm rollers due to strong chassis construction
- Ply on ramp allows roller machinery to be driven on and transported
- Spring assisted ramp available
